

# First American Money Market Funds

## Institutional Prime Obligations Fund – V Class

**Investment Strategy:** Seeks to provide maximum current income and daily liquidity by purchasing high-quality short-term debt securities such as commercial paper, repurchase agreements, variable rate demand notes and bank instruments.

### Net Annualized Monthly Average Yields

	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
See <a href="http://FirstAmericanFunds.com">FirstAmericanFunds.com</a> for additional historical performance information.												
<b>2023</b>	4.26%	4.45%	4.56%	4.70%	4.91%	4.98%	5.02%	5.19%	5.18%	5.20%	5.22%	5.21%
<b>2024</b>	5.18%	5.16%	5.19%	5.18%	5.17%	5.15%	5.14%	5.14%	4.94%	4.64%	4.51%	4.35%
<b>2025</b>	4.19%	4.18%	4.18%	4.19%	4.17%	4.19%	4.21%	4.19%	4.03%	3.91%	3.71%	

Performance quoted represents past performance and does not guarantee future results. Investment return will fluctuate so that an investor's shares, when redeemed, may be worth more or less than the original cost. Current performance may be lower or higher than quoted. For current month-end performance information, call 800.677.3863. Performance assumes the reinvestment of dividends and capital gains. Investment performance reflects fee waivers. Without waivers, returns and yields would be reduced.

Portfolio Characteristics		Ticker	CUSIP	Ratings
Total Net Assets (all classes)	\$1.2 billion	FPIXX	31846V435	Moody's Aaa-mf
Weighted Average Maturity (WAM)	3 days	<b>Cutoff Times</b>		
Inception Date	03/31/2006	Purchases and Redemptions	2:00 p.m. CT	S&P Global AAAM
Expense Ratio		<b>Current Yield† Sub. Unsub.</b>		
Gross	0.34%	7-Day Yield	3.74%	3.71%
Net¹	0.30%			

†Subsidized (Sub.) yields reflect fee waivers in effect. Without such waivers, yields would be reduced. Unsubsidized (Unsub.) yields do not reflect fee waivers in effect.

¹The advisor has contractually agreed to waive fees and reimburse fund expenses through December 31, 2026, so that the total annual fund operating expenses do not exceed as stated. These waivers and reimbursements may be terminated any time after December 31, 2026 by the advisor. Prior to that time, waivers and reimbursements may not be terminated without approval of the fund's board.

**Moody's Aaa-mf Rating:** Money market funds with this rating are judged to be of an investment quality similar to Aaa-rated fixed-income obligations; that is, they are judged to be of the highest quality.

**Portfolio Maturity:** Maturities of the portfolio's securities are determined using provisions of SEC Rule 2a-7, which allow the fund to consider certain floating- and variable-rate securities as having maturities shorter than their stated maturity dates.

**S&P Global AAAM Rating:** S&P Global evaluates a number of factors, including credit quality, market price, exposure, and management.

**Weighted Average Maturity (WAM)** is the time to maturity of all the securities held in the fund, weighted by each security's percentage of total investments. WAM measures a fund's sensitivity to interest rate changes.

**Mutual fund investing involves risk. This material must be preceded or accompanied by a current prospectus. It contains more information that investors should carefully consider about each fund, including risks, charges and expenses: call 800.677.3863 or visit [www.FirstAmericanFunds.com](http://www.FirstAmericanFunds.com). Please read it carefully before investing.**

*For Institutional Prime Obligations - You could lose money by investing in the fund. Because the share price of the fund will fluctuate, when you sell your shares they may be worth more or less than what you originally paid for them. The fund may impose a fee upon sale of your shares. An investment in the fund is not a deposit of U.S. Bank National Association and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The fund's sponsor is not required to reimburse the fund for losses, and you should not expect that the sponsor will provide financial support to the fund at any time, including during periods of market stress.*

## Investment Committee

Managed by the U.S. Fixed Income Investment Committee, whose members' average tenure at Dodge & Cox is 23 years.

## Investment Objective

Dodge & Cox Income Fund seeks a high and stable rate of current income, consistent with long-term preservation of capital. A secondary focus is to take advantage of opportunities to realize capital appreciation.

## Investment Approach

The Fund offers investors a highly selective, diversified, and actively managed core fixed income fund comprised of carefully-researched investments with attractive long-term risk/return prospects. Generally, we:

- Build a diversified portfolio of primarily investment-grade debt securities, including government and government-related obligations, mortgage- and asset-backed securities, corporate and municipal bonds, and other debt securities.
- Opportunistically pursue areas the benchmark may not cover, such as below investment-grade debt, debt of non-U.S. issuers, and other structured products.
- Select individual securities based on fundamental research and consider a variety of factors, including yield, credit quality, liquidity, covenants, call risk, duration, structure, and capital appreciation potential, as well as financially material environmental, social, and governance (ESG) issues.

## Performance<sup>3</sup>

Total Returns (%)

Bloomberg U.S.  
Aggregate Bond Index  
(BBG U.S. Agg)

## Average Annual Total Returns

	3 Months	YTD	1 Year	3 Years	5 Years	10 Years	20 Years
DODIX (Net)	2.51	6.94	3.39	6.57	1.29	3.23	4.14
BBG U.S. Agg	2.03	6.13	2.88	4.93	-0.45	1.84	3.23

Returns represent past performance and do not guarantee future results. Investment return and share price will fluctuate with market conditions, and investors may have a gain or loss when shares are sold. Mutual fund performance changes over time and may be significantly lower than stated above. Performance is updated and published monthly. Visit the Fund's website at [dodgeandcox.com](http://dodgeandcox.com) or call 800-621-3979 for current month-end performance figures.

Wells Fargo & Co.	1.0			
BNP Paribas SA	0.9			
TC Energy Corp.	0.8			

## Risks

The Fund invests in individual bonds and other securities whose yields and market values fluctuate, so that your investment may be worth more or less than its original cost. The Fund's performance could be hurt by interest rate risk, credit risk, below investment-grade securities risk, mortgage- and asset-backed securities risk, to-be-announced transaction risk, non-U.S. investment risk, liquidity risk, derivatives risk, call risk, sovereign and government-related debt risk, manager risk, market risk, and hybrid securities risk. Please read the [prospectus](#) for specific details regarding the Fund's risk profile.

- Based on yield to maturity, which is the total rate of return anticipated for a bond if it is held to maturity, assuming all interest payments are made on schedule and the original principal amount is repaid.
- Based on effective duration, which is a measure of a portfolio's price sensitivity to interest rate changes, being within the range of three to seven years.
- All returns are stated in U.S. dollars, unless otherwise noted. The Fund's total returns include the reinvestment of dividend and capital gain distributions, but have not been adjusted for any income taxes payable by shareholders on these distributions or on Fund share redemptions. Index returns include dividend and/or interest income but, unlike Fund returns, do not reflect fees or expenses.
- SEC Yield is an annualization of the Fund's net investment income for the trailing 30-day period. Dividends paid by the Fund may be higher or lower than implied by the SEC Yield.
- Portfolio Turnover is calculated as the lesser of the portfolio purchases or sales divided by the average portfolio value for the period.
- Tracking Error is a measure of risk. It is defined as the Standard Deviation of the portfolio's excess return vs. the benchmark expressed in percent.
- Standard Deviation measures the volatility of the Fund's returns. Higher Standard Deviation represents higher volatility.
- Sharpe Ratio is a risk-adjusted measure that calculates excess performance with respect to the risk-free rate per unit of volatility over the time frame.
- Net Cash & Other includes cash, short-term investments, unrealized gain (loss) on derivatives, receivables, and payables.
- The credit quality distributions shown for the Fund and the Index are based on the middle of Moody's, S&P, and Fitch ratings, which is the methodology used by Bloomberg in constructing its indices. A rating of AAA is the highest possible credit rating, while a rating in the C's or D's is the lowest. If a security is rated by only two agencies, the lower of the two ratings is used. Please note the Fund applies the highest of Moody's, S&P, and Fitch ratings to determine compliance with the quality requirements stated in its prospectus. On that basis, the Fund held 1.6% in securities rated below investment grade. For consistency purposes, we use the S&P and Fitch rating categories. The credit quality of the investments in the portfolio does not apply to the stability or safety of the Fund or its shares.
- The Fund's portfolio holdings are subject to change without notice. The mention of specific securities is not a recommendation to buy, sell, or hold any particular security and is not indicative of Dodge & Cox's current or future trading activity.
- Yield to Worst is a measure of the lowest possible yield that can be received on a bond that fully operates within the terms of its contract without defaulting. The distribution of this information must be preceded or accompanied by the prospectus.
- Effective Duration is a measure of a portfolio's price sensitivity to interest rate changes.

Figures represented by a dash are zero or have no associated data while figures represented by a zero may be rounded to zero.

Market values for debt securities include accrued interest.

The Bloomberg U.S. Aggregate Bond Index (BBG U.S. Agg) is a widely recognized, unmanaged index of U.S. dollar-denominated investment-grade fixed income securities.

# Vanguard Target Retirement Income Fund

Balanced fund (stocks and bonds)

## Fund facts

Total net assets	Expense ratio as of 01/31/25	Ticker symbol	Turnover rate	Inception date	Fund number
\$36,228 MM	0.08%*	VTINX	4.3%	10/27/03	0308

## Investment objective

Vanguard Target Retirement Income Fund seeks to provide current income and some capital appreciation.

## Investment strategy

The fund invests in other Vanguard mutual funds according to an asset allocation strategy designed for investors currently in retirement. The underlying funds are: Vanguard Total Stock Market Index Fund, Vanguard Total Bond Market II Index Fund, Vanguard Total International Stock Index Fund, Vanguard Total International Bond II Index Fund, and Vanguard Short-Term Inflation-Protected Securities Index Fund.

The fund's indirect bond holdings are a diversified mix of short-, intermediate-, and long-term U.S. government, U.S. agency, and investment-grade U.S. corporate bonds; inflation-protected public obligations issued by the U.S. Treasury; mortgage-backed and asset-backed securities; and government, agency, corporate, and securitized investment-grade foreign bonds issued in currencies other than the U.S. dollar (but hedged by Vanguard to minimize foreign currency exposure). The fund's indirect stock holdings are a diversified mix of U.S. and foreign large-, mid-, and small-capitalization stocks.

Plain talk about risk

Because the fund invests substantially all of its assets in underlying Vanguard funds, it is subject to underlying fund risk. This means that the fund is exposed to all of the risks associated with the investment strategies and policies of the underlying Vanguard funds, including the risk that the underlying funds will not meet their investment objectives. As the underlying funds invest in stocks and bonds the fund is subject to several stock and bond market risks, any of which could cause an investor to lose money. However, based on the fund's current allocation between stocks and the less volatile asset class of bonds, the fund's overall level of risk should be higher than those funds that invest the majority of their assets in bonds, but lower than those investing entirely in stocks. The fund also is subject to asset allocation risk, which is the chance that the selection of underlying funds and the allocation of fund assets will cause the fund to underperform other funds with a similar investment objective. For further details on all risks, please refer to the fund's prospectus.

Note on frequent trading restrictions

Frequent trading policies may apply to those funds offered as investment options within your plan. Please log on to [vanguard.com](https://vanguard.com) for your employer plans or contact Participant Services at 800-523-1188 for additional information.

For more information about Vanguard funds or to obtain a prospectus, see below for which situation is right for you.

# Vanguard Target Retirement 2030 Fund

Balanced fund (stocks and bonds)

## Fund facts

Total net assets	Expense ratio as of 01/31/25	Ticker symbol	Turnover rate	Inception date	Fund number
\$106,634 MM	0.08%*	VTHRX	6.6%	06/07/06	0695

## Investment objective

Vanguard Target Retirement 2030 Fund seeks to provide capital appreciation and current income consistent with its current asset allocation.

## Investment strategy

The fund invests in other Vanguard mutual funds according to an asset allocation strategy designed for investors planning to retire and leave the workforce in or within a few years of 2030 (the target year). The fund's asset allocation will become more conservative over time, meaning that the percentage of assets allocated to stocks will decrease while the percentage of assets allocated to bonds and other fixed income investments will increase. Within seven years after 2030, the fund's asset allocation should become similar to that of the Target Retirement Income Fund. The underlying funds are: Vanguard Total Stock Market Index Fund, Vanguard Total Bond Market II Index Fund, Vanguard Total International Stock Index Fund, Vanguard Total International Bond II Index Fund, and Vanguard Short-Term Inflation-Protected Securities Index Fund.

The fund's indirect bond holdings are a diversified mix of short-, intermediate-, and long-term U.S. government, U.S. agency, and investment-grade U.S. corporate bonds; inflation-protected public obligations issued by the U.S. Treasury; mortgage-backed and asset-backed securities; and government, agency, corporate, and securitized investment-grade foreign bonds issued in currencies other than the U.S. dollar (but hedged by Vanguard to minimize foreign currency exposure). The fund's indirect stock holdings are a diversified mix of U.S. and foreign large-, mid-, and small-capitalization stocks.

Plain talk about risk

Because the fund invests substantially all of its assets in underlying Vanguard funds, it is subject to underlying fund risk. This means that the fund is exposed to all of the risks associated with the investment strategies and policies of the underlying Vanguard funds, including the risk that the underlying funds will not meet their investment objectives. As the underlying funds invest in stocks and bonds the fund is subject to several stock and bond market risks, any of which could cause an investor to lose money. However, based on the fund's current allocation between stocks and the less volatile asset class of bonds, the fund's overall level of risk should be higher than those funds that invest the majority of their assets in bonds, but lower than those investing entirely in stocks. As the fund's allocation among underlying funds gradually changes, the fund's overall level of risk also will decline. The fund also is subject to asset allocation risk, which is the chance that the selection of underlying funds and the allocation of fund assets will cause the fund to underperform other funds with a similar investment objective. Investments in Target Retirement Funds are subject to the risks of their underlying funds. The year in the fund name refers to the approximate year 2030 when an investor in the fund would retire and leave the workforce. The fund will gradually shift its emphasis from more aggressive investments to more conservative ones based on its target date. An investment in the Target Retirement 2030 Fund is not guaranteed at any time, including on or after the target date. For further details on all risks, please refer to the fund's prospectus.

Plain talk about risk

Because the fund invests substantially all of its assets in underlying Vanguard funds, it is subject to underlying fund risk. This means that the fund is exposed to all of the risks associated with the investment strategies and policies of the underlying Vanguard funds, including the risk that the underlying funds will not meet their investment objectives. As the underlying funds invest in stocks and bonds the fund is subject to several stock and bond market risks, any of which could cause an investor to lose money. However, based on the fund's current allocation between stocks and the less volatile asset class of bonds, the fund's overall level of risk should be higher than those funds that invest the majority of their assets in bonds, but lower than those investing entirely in stocks. As the fund's allocation among underlying funds gradually changes, the fund's overall level of risk also will decline. The fund also is subject to asset allocation risk, which is the chance that the selection of underlying funds and the allocation of fund assets will cause the fund to underperform other funds with a similar investment objective. Investments in Target Retirement Funds are subject to the risks of their underlying funds. The year in the fund name refers to the approximate year 2040 when an investor in the fund would retire and leave the workforce. The fund will gradually shift its emphasis from more aggressive investments to more conservative ones based on its target date. An investment in the Target Retirement 2040 Fund is not guaranteed at any time, including on or after the target date. For further details on all risks, please refer to the fund's prospectus.

# Vanguard Target Retirement 2050 Fund

Balanced fund (stocks and bonds)

## Fund facts

Total net assets	Expense ratio as of 01/31/25	Ticker symbol	Turnover rate	Inception date	Fund number
\$92,367 MM	0.08%*	VFIFX	0.7%	06/07/06	0699

## Investment objective

Vanguard Target Retirement 2050 Fund seeks to provide capital appreciation and current income consistent with its current asset allocation.

## Investment strategy

The fund invests in other Vanguard mutual funds according to an asset allocation strategy designed for investors planning to retire and leave the workforce in or within a few years of 2050 (the target year). The fund's asset allocation will become more conservative over time, meaning that the percentage of assets allocated to stocks will decrease while the percentage of assets allocated to bonds and other fixed income investments will increase. Within seven years after 2050, the fund's asset allocation should become similar to that of the Target Retirement Income Fund. The underlying funds are: Vanguard Total Stock Market Index Fund, Vanguard Total Bond Market II Index Fund, Vanguard Total International Stock Index Fund, Vanguard Total International Bond II Index Fund, and Vanguard Short-Term Inflation-Protected Securities Index Fund.

The fund's indirect bond holdings are a diversified mix of short-, intermediate-, and long-term U.S. government, U.S. agency, and investment-grade U.S. corporate bonds; inflation-protected public obligations issued by the U.S. Treasury; mortgage-backed and asset-backed securities; and government, agency, corporate, and securitized investment-grade foreign bonds issued in currencies other than the U.S. dollar (but hedged by Vanguard to minimize foreign currency exposure). The fund's indirect stock holdings are a diversified mix of U.S. and foreign large-, mid-, and small-capitalization stocks.
